

ENVIRONMENT GRANTS 2024

ENVIRONMENT
Engineering and
Environment Division

ville.vaudreuil-dorion.qc.ca

**RÉDUIRE ENSEMBLE
NOTRE EMPREINTE**

INTRODUCTION

The City of Vaudreuil–Dorion is proud to offer its citizens several environmental grants. They're in effect throughout the year, subject to availability of funds. The reference year runs from January 1 to December 31. Each household may apply once a year for each grant. Applications are processed for the year in which they are submitted and require a minimum refund of \$15 to be eligible. The purchases must have been made in a company that complies with municipal regulations. The rebate amount is calculated before taxes. The City cannot subsidise companies.

The grants are divided into five categories: zero waste, organic waste, air quality, drinking water, trees and plants. The eligibility criteria are detailed for each of the grants. The form is at the end of the document.

Applications can be submitted:

- by email at enviro-subventions@ville.vaudreuil-dorion.qc.ca;
- online at ville.vaudreuil-dorion.qc.ca;
- by mail at Engineering and Environment Division, 2555, rue Dutrisac, office 200, Vaudreuil–Dorion J7V 7E6;
- at the City Hall.

ZERO WASTE

CLOTH DIAPERS

Toilet training of a child requires 5,000 to 7,000 disposable diapers—that means 4.5 trees and 22 kg of plastic obtained from 67 kg of crude oil. It also means over a ton of waste that will take more than 500 years to decompose. To encourage young families to use cloth diapers, the City of Vaudreuil–Dorion will reimburse young families 50% of the cost of purchasing or renting cloth diapers, including swim diapers, flat diapers, diaper pants, inserts and liners up to \$100 per child per residence.

Conditions

- Diapers must have been purchased or rented from a company established in Québec no more than 12 months before the application is submitted.
- The children must be not yet born, less than 12 months old, or if adopted, the adoption must have taken place less than 12 months ago.

Required documentation

- Application form indicating child's name and date of birth.
- Proof of residence.
- Proof of purchase or rental including type(s) of diaper, company name and address, GST and QST numbers, and date of purchase or rental contract.

CONSUMER PRODUCTS

Based on the principles of refuse/reduce/reuse/recycle/repurpose, more and more zero-waste products are available on the market. To encourage the adoption of such products, the City will reimburse 50% of the purchase cost of reusable products replacing a single-use product up to a maximum of \$100/year per household. The amount is increased by 75% if the products were bought from a Vaudreuil-Soulanges business.

ELIGIBLE PRODUCTS ARE AS FOLLOWS:

- Plastic or wool dryer balls
- Battery chargers and rechargeable batteries (AA, AAA, C, D)
- Washable breastfeeding compresses
- Menstrual cups
- Reusable bowl covers or reusable beeswax films
- Washable potty training pants
- Washable pants and pads for bladder weakness, incontinence, enuresis or menstruation (including swimwear)
- Reusable paper towels
- Reusable coffee filters or pods
- Washable handkerchiefs
- Toilet paper, tissues or washable wipes
- Reusable produce bags
- Reusable shopping bags
- Washable makeup removal pads

Conditions

- Purchase made from a company established in Québec no more than 12 months prior to the application.

Required documentation

- Application form and proof of residence.
- Proof of purchase including type(s) of product, company name and address, GST and QST numbers, and date of purchase.

ORGANIC WASTE

COMPOSTERS

The aim of composting is to reclaim waste on-site and decrease the amount of garbage sent to landfill. It's easy to do at home. This grant will reimburse residents up to \$50 for the purchase or construction of a composter, up to a maximum of two composters per household annually.

Conditions

- Purchase made in a store located within the MRC de Vaudreuil-Soulanges in the 12 months prior to the application.

Required documentation

- Form and proof of residence.
- Proof of purchase indicating type(s) of composter or material, company name and address, GST and QST numbers, and date of purchase.
- Photos before and after the installation of composter(s) showing the building, as well as a photo of the building façade with the address.
- Proxy or written agreement of owner (if applicable).

MANUAL LAWNMOWERS AND SHREDDER BLADES FOR LAWNMOWERS

Grasscycling involves leaving grass clippings on the lawn after mowing, which adds nutrients to the soil and reduces the amount of green waste sent to landfill. Under this grant, up to \$50 of the cost of purchasing a manual roller lawnmower (excluding any gas or electric mower) or grasscycling shredder blades will be reimbursed.

Conditions

- Purchase made in a store located within the MRC de Vaudreuil-Soulanges in the 12 months prior to the application.
- The purchase of a gas or electric mower is not eligible for the grant.

Required documentation

- Application form and proof of residence.
- Proof of purchase specifying that it was for a manual landmower or shredder blades, along with company name and address, GST and QST numbers, and date of purchase.
- Photo of the blade(s) and mower.
- Proxy or written consent of owner (if applicable).

AIR QUALITY

RADON DETECTORS

Radon is a radioactive gas naturally present in the earth as a result of uranium breakdown. It's colourless, odourless and flavourless, and when released into the air it mixes with other gases. When this happens, the concentration is too low to constitute a health hazard, but radon gas can leak into buildings and accumulate there. If the concentration is high enough, it can lead to health problems; in fact, radon is the second leading cause of lung cancer in Québec.

To measure radon levels in residential buildings, the City of Vaudreuil-Dorion sells radon detectors for just \$5, including analysis and shipping. For a conclusive test, the detector must be left in the same place for at least three months (between November and April) and up to 12 months. Only one detector may be purchased per household.

Conditions

- Purchases can be made via the City's website or by phone at 450-455-3371, option 1, starting September 5 of each year.
- Hold a valid citizen card to apply online.
- Detector pick-up at the fall distribution days, the dates of which will be posted on the City's website. No refunds will be given for detectors that are not picked up.
- Follow instructions for long-term testing of indoor air radon, issued by the Association pulmonaire du Québec.

Required documentation

- For and proof of residence.
- Proxy or written agreement of owner (if applicable).

RADON MITIGATION SYSTEM

If the concentration of radon in a residential building is above the Canadian Action Level (200 Bq/m³), it is recommended that work be done to reduce the concentration of the gas. To help citizens add a radon mitigation system to their homes, the City will reimburse 50 per cent of the cost of installing a radon mitigation system to a maximum of \$500 per residence.

Conditions

- Installation of the radon mitigation system performed by a PNCRC certified company located in Québec.
- All documents must be submitted **BEFORE** December 31 of the reference year, the year in which the work was carried out.
- The radon concentration must be above the Canadian Action Level (200 Bq/m³, including the margin of error).
- The radon test must have been performed following a long-term installation, for a minimum of three months, between November and April. It can remain in place for a maximum of 12 months.

Required documentation

- Application form and proof of residence.
- Proof of purchase of a radon mitigation system specifying the product(s) purchased, the name and address of the company, the GST and QST numbers, the date of installation and the address where it was carried out.
- Radon test results proving that the detector has been installed in the same location for a minimum of three months between November and April (report from an accredited laboratory or photos indicating the dates) and for a maximum of 12 months.
- Photo of the installation of the mitigation system.
- Proxy or written consent of owner (if applicable).

RENEWAL OF REPLACEMENT OF OLD WOOD HEATERS

Non-certified wood-burning appliances that do not meet EPA or CSA B415.1 standards release a huge quantity of fine particles due to incomplete combustion of the wood. These particles affect air quality and penetrate easily into the lungs, posing a danger to public health. To reduce air pollution, the City offers \$250 for removal or \$500 for replacement of an old wood heater in Vaudreuil-Dorion homes.

Conditions

- Eligibility must be determined by an employee of the Engineering and Environment Division **BEFORE** the work is done.
- The old heater must not be any of the following:
 - comply with at least one EPA or CAN/CSA environmental standard;
 - in a secondary residence;
 - non-functional or decorative;
 - located in a non-living area (e.g., a garage).
- The old appliance must be recycled (supporting documents needed).
- The new heater must all of the following:
 - bought in a store located in the MRC de Vaudreuil-Soulanges;
 - new;
 - wood, gas or pellet-burning (not electric or ethanol-burning);
 - compliant with all environmental, safety and installation standards;
 - compliant with municipal by-laws (including obtaining a Certificate of Approval from the City);
 - installed in a residence according to manufacturer's instructions;
 - installed by a contractor licensed by the RBQ for the work performed.
- All required documents must be submitted **BEFORE** December 31 of the reference year (year when the work was done).

Required documentation

- Application form and proof of residence.
- Photos of old heater before dismantling.
- For a replacement:
 - Photos of the newly installed device;
 - Photos of an installed smoke/carbon monoxide detector;
 - Proof that the old unit was recycled;
 - Proof of new heater's compliance with EPA or CSA 415.1 standard or the most recent if woodburning;
 - Proof of purchase (if applicable) stating company name and address, RBQ licence number, make and model of new appliance, GST and QST numbers, purchase date and installation date;
 - Certificate of compliance for new heater (if applicable).
- Proxy or written consent of owner (if applicable).

BIKES AND ACCESSORIES

The bicycle is an ideal means of transport for the city. Whether it's used for shopping, commuting or just for a ride, cycling helps reduce traffic congestion and greenhouse gas emissions, increases travel efficiency and is good for your health.

In order to promote healthy lifestyles while reducing greenhouse gas emissions on its territory, the City offers its citizens a subsidy for the purchase of traditional and electric bikes. It provides a maximum reimbursement of \$50 for a new bike or \$75 for a used bike. Bicycle accessories to increase their carrying capacity are also accepted. The City subsidizes 50% of the cost of purchasing a bike bag, bike trailer or infant seat to a maximum of \$50 per residence.

Conditions

- The purchase is made in a business located in the MRC de Vaudreuil-Soulanges territory in the 12 months preceding the request.
- The purchase of a scooter, electric scooter or electric scooter is not eligible for this subsidy.

Required documentation

- Application form and proof of residence.
- Proof of purchase specifying the name and address of the company, the GST and QST numbers and the date of purchase.
- For traditional bicycles:
 - Photos of bicycle(s), bicycle helmet(s) and reflectors (front and rear of bicycle, front wheel and rear wheel).
- For electric bicycles:
 - Photos of bicycle(s), bicycle helmet(s) and reflectors (front and rear of bicycle, front wheel and rear wheel);
 - Proof that the bicycle purchased is electric, with a maximum power of 500 W and a maximum speed of 32 km/h.
- For bicycle accessories:
 - Photos of the bicycle accessories.

CHARGING STATIONS FOR ELECTRIC VEHICLES

Using an electric vehicle instead of a gasoline-powered vehicle in Quebec can reduce the amount of greenhouse gases emitted into the atmosphere by 80%. Quebec has reached the milestone of having 100,000 electric or hybrid vehicles on its roads by 2021.

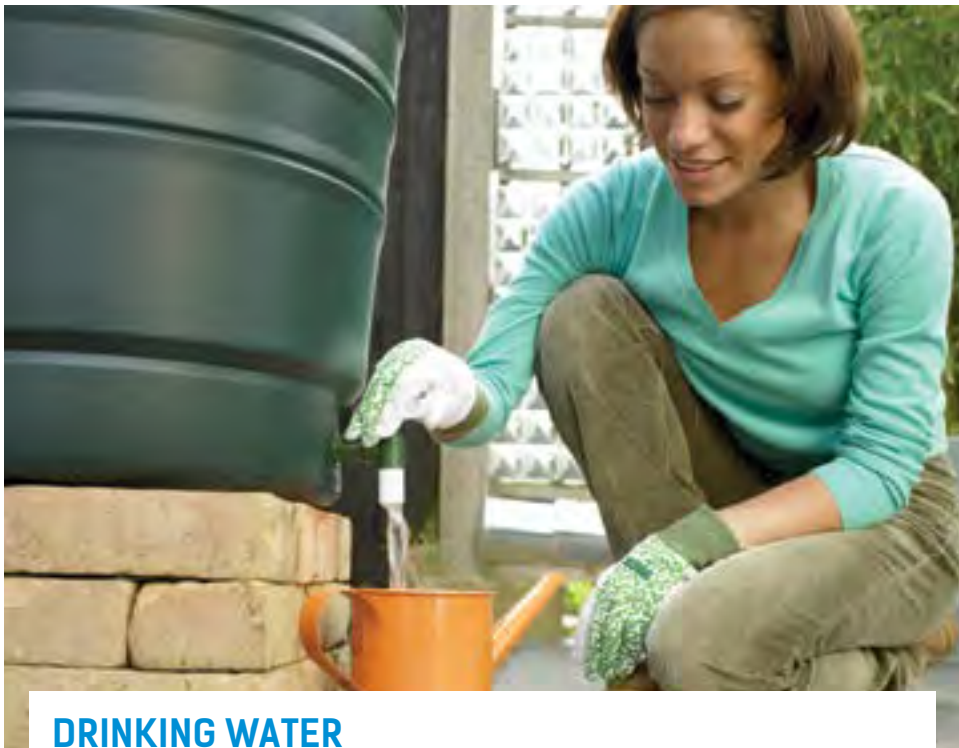

To encourage the purchase of these vehicles, the City is offering a \$150 reimbursement for the purchase and installation of a home electric vehicle charging station, up to a maximum of one per address.

Conditions

- All required documentation must be filed BEFORE December 31st of the reporting year in which the purchase and installation was completed.
- The terminal must be installed on a residential property in Vaudreuil-Dorion.
- Installation carried out by a contractor or a company located in Quebec.

Required documentation

- Form and proof of residence.
- Photos before and after the installation of the charging station.
- Photo of the front of the building showing the address.
- Proof of purchase indicating the name and address of the company, GST and QST numbers and date of purchase.
- Proof of installation showing the company name and address, GST and QST numbers, date of installation and the address where the installation was performed.
- Proxy or written agreement from the owner (if applicable).

DRINKING WATER

RAIN BARRELS

Rainwater is unchlorinated, warm and pH-balanced. It can be used for watering flowerbeds, gardens and lawns, washing vehicles or filling a swimming pool. One barrel reduces drinking water consumption by 4,000 litres a year. The City offers grants of up to \$50 for the purchase of rain barrels (maximum two barrels per household per year).

Conditions

- Purchase made in a store located within the MRC de Vaudreuil-Soulanges in the 12 months prior to the application.

Required documentation

- Application form and proof of residence.
- Proof of purchase specifying rain barrel type(s), company name and address, GST and QST numbers, and purchase date.
- Photos before and after the installation of rain barrel(s) showing the building, as well as a photo of the building façade with the address.
- Proxy or written consent of owner (if applicable).

INDOOR DEVICES

A Quebecer consumes 573 litres of water per day, 28% more than the Canadian average. Approximately 30% is used for toilets, 30% for showers and baths, 20% for laundry and 10% for cooking and drinking. The indoor water-saving devices grant has two components: Low-flow toilets and Plumbing kits. A resident can apply for each component.

Low-flow toilet

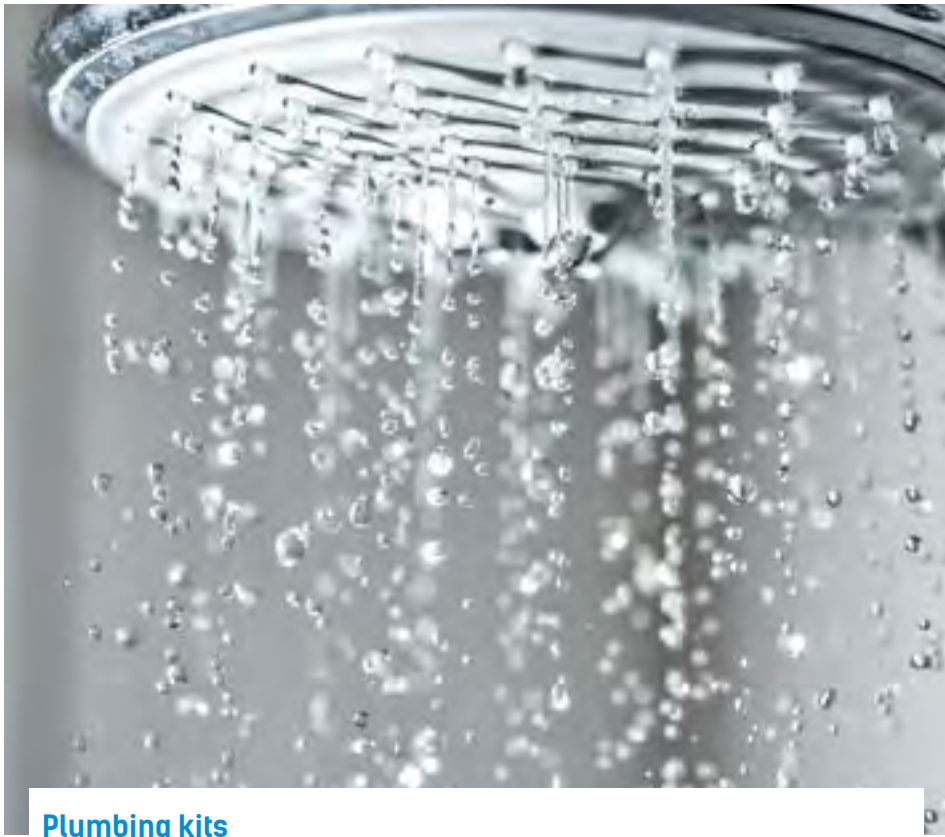

A standard toilet uses 13 to 20 litres for each flush. When you replace an old toilet with a low-flow toilet, you save at least 50 litres of water a day. This grant provides a reimbursement of up to \$75 for the purchase of a low-flush toilet up to a maximum of two toilets per residence per year.

Conditions

- Purchase made in a store located within the MRC de Vaudreuil-Soulanges in the 12 months prior to the application.
- The old toilet(s) must be recycled. Please note that toilets collected during the bulky waste collection are not recycled. Only those brought to the ecocentre are recycled.
- Be connected to the municipal sewer system.
- The new toilet(s) must have at least one of the following characteristics:
 - 6 litres or less;
 - dual flush;
 - WaterSense certified;
 - designated HET (high-efficiency toilet).

Required documentation

- Application form and proof of residence.
- Proof of purchase specifying toilet type(s) and showing that the required specifications are met, company name and address, GST and QST numbers, and purchase date.
- Proof that the original toilet(s) have been recycled (signed document from the recycling company, to be requested on arrival at the ecocentre).
- Photo of toilet before work.
- Photo of installation of low-flow toilet.
- Proxy or written consent of owner (if applicable).

Plumbing kits

Using low-flow shower heads and taps reduces the quantity of water consumed, without decreasing water pressure. The City has purchased water-saving plumbing kits and sells them to citizens at low cost. Prices are as follows:

- **Basic kit (\$5):** kitchen tap aerator, bathroom tap aerator, toilet tank bag and small fixed showerhead
- **Design kit (\$10):** kitchen tap aerator, bathroom tap aerator, toilet tank bag and medium-sized fixed showerhead
- **Deluxe kit (\$10) :** kitchen tap aerator, bathroom tap aerator, toilet tank bag and telephone showerhead

A household may purchase more than one kit.

Conditions

- Must be purchased at Vaudreuil-Dorion City Hall.

Required documentation

- Application form and proof of residence.

TREES AND PLANTS

TREE PLANTING

The City of Vaudreuil-Dorion wishes to raise awareness among citizens about the importance of urban trees on private property and thus increase their number on the territory. In addition to beautifying the city, increasing air quality and fighting against heat islands, trees increase property values and the quality of life of residents. The tree planting grant has two components: One human, one tree and Let's make our City greener. A resident can apply for each component.

NON-ELIGIBLE SPECIES

The following species are not eligible for subsidy:

- Norway maple, flat maple or bird's-eye maple (*Acer platanoides*)
- Glossy Buckthorn (*Rhamnus frangula*)
- Cathartic buckthorn (*Rhamnus cathartica*)
- Siberian Elm (*Ulmus pumila*)
- All species of the genus *fraxinus*

The following species are not eligible for the subsidy unless they are planted in riparian buffer:

- Hemlock maple (*Acer negundo*)
- Silver maple (*Acer saccharinum*)
- American elm (*Ulmus americana*)
- White poplar (*Populus alba*)
- Lombardy poplar (*Populus nigra italica*)
- Canadian poplar (*Populus Deltoides*)
- Quaking aspen (*Populus Tremuloides*)
- Bay willow (*Salix pentandra*)
- Weeping willow (*Salix alba tristis*)

Une naissance, un arbre (One human, one tree)

When a child is born or adopted, Vaudreuil-Dorion residents can claim up to \$200 towards the purchase of a tree. The grant is available only once per child, but can be claimed up to five years after the child's birth.

Conditions

- The child must be five years of age or younger or, in the case of an adoption, must have been formalized within the last five years.
- The tree must be a woody plant with a single trunk that branches at a certain height from the ground, with a minimum height at maturity of 5 m.
- The spread of the mature tree must comply with the requirements of the felling permit, where applicable (small spread, height 5 to 8 m, medium spread, height 8 to 20 m, large spread, 20 m and over)
- The tree must respect the minimum size required at planting:
 - For conifers, minimum height 100 cm;
 - For deciduous trees, minimum height 200 cm or diameter (trunk width) 30 mm (3 cm). Diameter must be measured at 30 cm from the ground.
- The purchase is made in a business located in the MRC de Vaudreuil-Soulanges territory in the 12 months preceding the request.
- Plantings that are mandatory as a result of a regulatory infraction are not eligible for this grant.

Required documentation

- Form indicating child's name and date of birth.
- Proof of residence.
- Proof of purchase specifying the specie, company name and address, GST and QST numbers and date of purchase.
- Photos of the planting site, before and after work, and of the façade of the building showing the address.
- Proof of minimum size required:
 - For conifers, invoice or tree label showing minimum height of 100 cm;
 - For deciduous trees, invoice or tree label showing minimum height of 200 cm or photo of measuring tape showing minimum diameter (trunk width) of 30 mm (3 cm) at 30 cm from the ground.
- Owner's power of attorney or written agreement (if applicable).

Verdissons Vaudreuil-Dorion (Let's make our city greener)

This grant offers Vaudreuil-Dorion homeowners a refund of up to \$200 per tree. Each household can receive a grant for three trees each year.

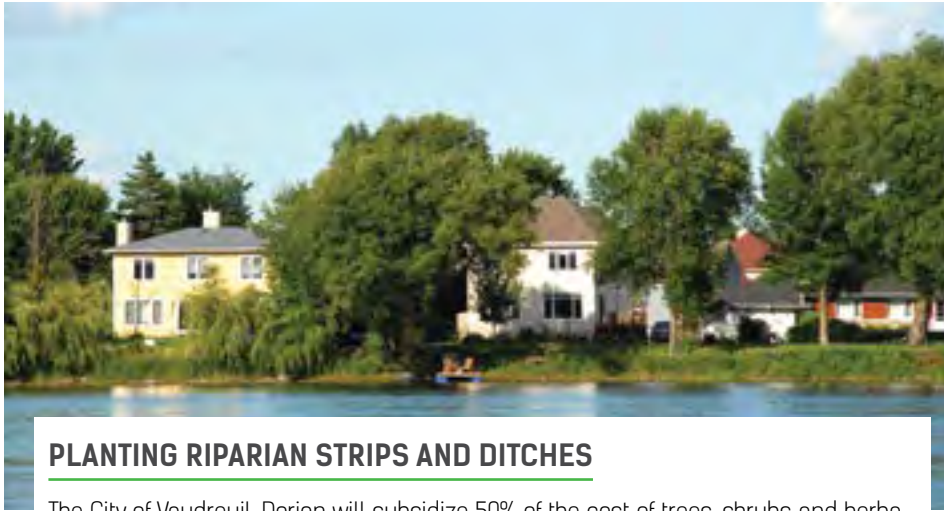

Conditions

- The tree must be a woody plant with a single trunk that branches at a certain height from the ground, with a minimum height at maturity of 5 m.
- The spread of the mature tree must comply with the requirements of the felling permit, where applicable (small spread, height 5 to 8 m, medium spread, height 8 to 20 m, large spread, 20 m and over).
- The tree must respect the minimum size required at planting:
 - For conifers, minimum height 100 cm;
 - For deciduous trees, minimum height 200 cm or diameter (trunk width) 30 mm (3 cm). Diameter must be measured at 30 cm from the ground.
- The purchase is made in a business located in the MRC de Vaudreuil-Soulanges territory in the 12 months preceding the request.
- Plantings that are mandatory as a result of a regulatory infraction are not eligible for this grant.

Required documentation

- Application form and proof of residence.
- Proof of purchase specifying the specie, company name and address, GST and QST numbers and date of purchase.
- Photos of the planting site, before and after work, and of the façade of the building showing the address.
- Proof of minimum size required:
 - For conifers, invoice or tree label showing minimum height of 100 cm;
 - For deciduous trees, invoice or tree label showing minimum height of 200 cm or photo of measuring tape showing minimum diameter (trunk width) of 30 mm (3 cm) at 30 cm from the ground.
- Owner's power of attorney or written agreement (if applicable).

PLANTING RIPARIAN STRIPS AND DITCHES

The City of Vaudreuil-Dorion will subsidize 50% of the cost of trees, shrubs and herbaceous perennials used to revegetate a riparian strip or ditch up to 5 m from the top of the embankment, to a maximum of \$300.

Conditions

- Eligibility will be determined by an Environment Section employee BEFORE the work begins and after submission of a planting plan to scale including plant locations, species and sizes.
- The planting must be carried out in accordance with municipal regulations (including obtaining a certificate of authorization from the City).
- Selected plants must preferably be indigenous, hardy, adapted to the receiving environment and recognized for riparian characteristics.
- Purchase made in a store located within the MRC de Vaudreuil-Soulanges.
- All documents must be provided BEFORE December 31 of the reference year (the year in which the work was done).
- Mandatory plantations under a notice of violation or a statement of offence are not eligible for this grant.

Required documentation

- Application form and proof of residence.
- Plantation plan.
- Proof of purchase including species or type of vegetation, height and diameter, company name and address, GST and QST numbers, and date of purchase.
- Photos of plantation site before and after planting.
- Proxy or written consent of owner (if applicable).

TREEAZIN TREATMENT OF PRIVATE ASH TREES

The Emerald Ash Borer, an exotic insect from Asia, is attacking ash trees in North America. The mortality rate is close to 100%. Ash trees can be treated preventively with a registered systemic insecticide: TreeAzin. This treatment prolongs the life of ash trees by protecting them from the insect. The grant reimburses 50% of the cost of treating private ash trees in residential areas, for a maximum of two ash trees per address, per year, to a maximum of \$200 per tree. Note that it is recommended that the tree be treated two years out of three to give the tree a rest period.

Conditions

- Eligibility must be determined by an employee of the Environment Section **BEFORE** treatment.
- The trees must:
 - be at least 15 cm in diameter at chest height;
 - in good health as judged by the Environment Section employee;
 - be located on a residential lot.
- The treatment must be done between June 1st and August 31st of the reference year.
- All documentation must be submitted **BEFORE** December 31st of the reference year, the year in which the work was carried out

Required documentation

- Application form and proof of residence.
- Proof of treatment indicating contractor name, treatment date, number of ashes treated, chest-height diameter of each ash treated, product used, and GST and QST numbers.
- Proxy or written consent of owner (if applicable).

EMERALD ASH BORER-AFFECTED PRIVATE ASH TREES CUTTING

It is often desirable to cut down an ash tree showing signs of infestation in order to limit the damage it may cause when it falls. The grant consists of a reimbursement of 50% of the cost of cutting ash trees located on private property in residential areas, up to a maximum of \$400, per address, per year. Unless otherwise specified, this grant will be combined with the Verdissons Vaudreuil-Dorion grant, which reimburses up to \$200 per tree planted for a maximum of three trees per address per year.

Conditions

- The felling, planting and filing of the required documents must be done within 12 months of the issuance of the certificate of authorization for the felling of trees by the City.
- The cutting of ash trees must be done by a company or contractor located in the MRC of Vaudreuil-Soulanges.
- A certificate of authorization for the felling of trees must be obtained from the City and must be respected.
- Each ash tree subsidized for felling must be replaced by a tree meeting the criteria of the Verdissons Vaudreuil-Dorion grant, in addition to the following criteria:
 - Have a mature medium or large-scale deployment;
 - Minimum size required for a coniferous tree, i.e. 100 cm in height, or for a deciduous tree, i.e. 200 cm in height or minimum diameter (width of trunk of 30 mm (3 cm) at 30 cm from the ground.
- New tree purchased in a business located on the territory of the MRC of Vaudreuil-Soulanges.

Required documentation

- Application form and proof of residence.
- City Certificate of Approval number.
- Proof of ash cutting specifying the name and address of the company or contractor who carried out the cutting, the date of the cutting, the individual cost for each tree cut, the GST and QST numbers.
- Proof of purchase specifying the species purchased, the size(s) (height and diameter), the name and address of the company, the GST and QST numbers and the date of purchase.
- Photos of the planting site, before and after the work, and of the front of the building showing the address.
- Before and after photos of the ash tree being cut down.
- Proof of minimum size requirement: :
 - For a coniferous tree, invoice or label of the tree showing the minimum height of 100 cm;
 - For a hardwood, invoice or tree tag showing the minimum height of 200 cm or photo of a tape measure showing the minimum diameter (trunk width) of 30 mm (3 cm) at 30 cm from the ground.
- Proxy or written consent of owner (if applicable).

GRANT APPLICATION FORM

Name: _____ First name: _____

Address: _____

City: _____ Postal code: _____

Phone: _____ Email: _____

ZERO WASTE

Cloth diapers: _____ Kid(s) Purchase or Rent

Kid's name: _____ Date of birth: _____

Consumer products

ORGANIC WASTE

Composter: 1 composter or 2 composters Building materials

Schredder blades: 1 blade or 2 blades Manual lawnmower

AIR QUALITY

Radon detector

Installation of a radon mitigation system

Wood heater: Removal or Replacement

Bicycle: Traditionnal Electrical Accessories

_____ New _____ Used _____ Accessories

Installation of a charging station for electric vehicles

DRINKING WATER

Rain barrel: 1 barrel or 2 barrels

Indoor devices:

Low-flow toilet: 1 toilet or 2 toilet

Plumbing kit: _____ Basic kit (\$5)
_____ Design kit (\$10) _____ Deluxe kit (\$10)

TREES AND PLANTS

Tree planting

Une naissance, un arbre

Kid's name: _____ Date of birth: _____

Verdissons Vaudreuil-Dorion : 1 tree or 2 trees or 3 trees

Planting riparian strips and ditches

TreeAzin treatment of private ash trees: 1 ash tree or 2 ash trees

Emerald ash borer-affected private ash trees cutting : _____ ash trees felled and replaced by a medium or large spreading tree according to the authorised list

COMMITMENT

I, _____ (name in capital letters), undertake to respect the details of the grant for which I am making this request for reimbursement and authorize a representative of the City to visit the premises to validate the conformity of the request. I certify that the subsidy requested is used for a residence located on the territory of Vaudreuil-Dorion.

Signature : _____ Date : _____

Grant applications must be sent to the City by email at enviro-sbvventions@ville.vaudreuil-dorion.qc.ca, by mail or be dropped off at the Engineering and Environment Department at 2555 Dutrisac Street, Vaudreuil-Dorion, Quebec J7V 7E6.
