

**FOR IMMEDIATE RELEASE**

## **Organics: bi-weekly collection returns**

**Vaudreuil-Dorion, November 1, 2024** – The City of Vaudreuil-Dorion wishes to inform its citizens that the bi-weekly organics collection service will resume for the winter season, starting November 18. This new schedule will begin on November 18 for sectors A and B, and on November 25 for sectors C, D and E. Exact dates are indicated in the municipal calendar.

Remember that plastic bags, even if identified as compostable, biodegradable or oxobiodegradable, are not permitted in the brown bin. This measure is designed to guarantee the quality of the compost generated at the composting center. The presence of plastic films can seriously compromise the efficiency of the decomposition process and alter the final product. We therefore recommend that you use paper bags, make wrappers from unwaxed paper circulars, or simply place bulk materials in the brown bin.

### **Green waste**

Although green waste is accepted in the brown bin, collections are offered in the fall. Two are still to come, during the weeks of November 4 and November 18. Only paper bags and bulk waste (e.g. in a large plastic bin, a garbage can other than a wheeled bin, etc.) are accepted at this collection. They must be deposited at the curb before 7 a.m. on Monday morning to ensure collection during the week.
